---

## EDUCATION

---

**Savitribai Phule Pune University**

**Expected 2024**

Bachelors of Computer Engineering, GPA: 8.1

---

## SKILLS SUMMARY

---

- **Languages:** C, C++, **JavaScript**, Python.
  - **Libraries/Frameworks:** **ReactJS**, NextJS, ExpressJS, NodeJS, TailwindCSS.
  - **Tools/DBMS:** Git, GitHub, MS Office, **MongoDB**, SQL, MySQL.
  - **Course works:** Data Structure, Algorithms, **Web Development**, OOPS.
  - **Non-Technical Skills:** **Problem Solving**, Critical & Analytical Thinking.
  - **Interests:** Weight Lifting, Music Production (YoutubeLink)
- 

## WORK EXPERIENCE

---

**Front-end Intern | Unix Technologies**

**Apr 2023 – Sept 2023**

- Collaborated with the development team to create responsive and user-friendly web applications using ReactJS and TailwindCSS.
- Worked closely with designers and backend developers to integrate frontend components with backend services and APIs.

Key Technologies Used: ReactJS, TailwindCSS, JavaScript, HTML, CSS, Git.

---

## PROJECTS

---

**Book Cafe | [GitHub](#)**

**[Web Application](#) | Feb 2024 – May 2024**

*Essentials Skills: NextJS, TailwindCSS, Appwrite.*

- Designed and implemented various e-commerce functionalities, including product browsing, adding books to the cart, and multiple payment options, enhancing user convenience and satisfaction.
- Implemented Google account authentication to streamline the login process, allowing users to access personalized features and securely manage their accounts.
- Integrated Appwrite as the backend server, leveraging its authentication and database features to manage user accounts and store product information securely.

**Ammunition Management System | [GitHub](#)**

**[Web Application](#) | Nov 2023 – Dec 2023**

*Essentials Skills: NextJS, TailwindCSS, Solidity, Hardhat.*

- Implemented blockchain technology to ensure data integrity and security, leveraging the Ethereum network for decentralized storage and validation of ammunition-related information.
  - Utilized solidity for smart contract development, implemented logic for handling ammunition data storage, transfer and validation on the blockchain.
  - Deployed smart contract to the Arbitrum Ethereum testnet via infura, enabling users to test and interact with the application in a simulated blockchain environment.
- 

## CERTIFICATES

---

**Data Structures and Algorithms in C++ | [Coding Ninja](#)**

**Problem Solving (Intermediate) | [HackerRank](#)**
